Introduction

The 17th of a series started in 1983 (SURPHON workshops) as a regular meeting event for theoretical and experimental surface physicists and chemists along the years, the workshop complements traditional topics for the series (growth, vibrations, surface chemistry...) with timely subjects: this edition, emphasis will be on the properties of hybrid organic-inorganic interfaces.

Sessions

- Molecule-surface interactions
- Electron transfer
- Spectroscopy
- Growth and characterization
- Friction
- Surface chemistry
- Vibrations and diffusion
- Applications
